INTERNATIONAL SEARCH REPORT

PCT/US04/10641

Continuation of Box II Reason2:

In these claims, the numerous variables (e.g. R1-R3, G1, G2, X, Y, L, Ar, etc), their voluminous complex meanings, their seemingly endless permutations and combinations make it virtually impossible to determine the full scope and complete meaning of the claimed subject matter. As presented, the claimed subject matter cannot be regarded as being a clear and concise description for which protection is sought and as such the listed claims do not comply with the requirements of PCT article 6. Thus it is impossible to carry out a meaningful search on same. A search will be made on the first discernable invention in the claims, which is the first named compound of claim 2.
